

# Information for parents re. Zoom app

*Please be aware that there have been serious concerns raised over the safety of using the Zoom app. These concerns include a concept called 'Zoom-bombing' in which children using the app, have been unexpectedly and suddenly exposed to highly inappropriate, adult materials.*

*If you or your child are going to use 'Zoom' or any other online video meeting/conference software, then please ensure that the correct security settings/controls are in place to minimise the risk of infiltration.*

*However, be aware these programmes are being hacked regardless of the clear efforts made by the end user.*
